VX60 PORTABLE

A transportable secure wireless networking system

With its VX60 technology, Virewirx unlocked the highest-possible-quality wireless immersive experiences and simulations for the XR community. Now, one can achieve the same high-fidelity offered by the VX60 fixed installation in a "pop-up" compact system. **VX60 Portable** provides a massive upgrade to untethered virtual reality experiences with its proprietary wireless 60GHz technologies in an easy-to-transport package. Customers can easily carry, assemble, and disassemble a wireless XR system that delivers the most secure, seamless, interactive virtual reality experiences with an unmatched level of convenience.

PRODUCT SPECIFICATIONS

Physical Dimensions	VX60 Core: 27″ x 23″ x 12″
Wireless Standard	IEEE 802.11ad
Operating Frequency	60 GHz ISM Band
Total Aggregated Throughput	2 Gbps+
Latency	<15 ms
Power Requirements	VX60 Core: 120V
End-user Device Interface	USB Type-C

Profiles

DL Centric	2 Gbps+
UL Centric	2 Gbps+
VR Profile	8-16 users

ABOUT

VX60 Portable packs advanced networking equipment into a small mobility rack within a wheelable case. It uses COTS servers, a core switch, and a media switch to construct a 60Ghz wireless network system that ensures an error-free user experience. The base package includes a Network Controller, a Network Management System, and an L3 switch. 60Ghz is an unlicensed wireless spectrum that is globally available for use without requiring activation or utilization fees. Our Access Point Host and 60Ghz Radios are purpose-built for Virewirx's unique VX60 solution.

VX60 Portable App
Easily connect to your VX60 Portable system to deploy and manage your network.
